Finance Solutions

OPM Leasing   
opm business & technology finance

We believe long term relationships need special attention. For OPM, adapting to change and responding to new challenges is second nature. The events of the last few years have placed increasing demands on our unique qualities of honesty, innovation and expertise, which continue to serve the interests of our customers. At OPM we have responded to change with speed, flexibility and innovation that has always been the hallmark of our success. Business and Technology Finance has never been as competitive as it is today. OPM are continuing to improve service standards and stay responsive and adaptable to customers changing needs.

The power behind the **extraordinary**, is our people, a talented team who work together to produce the right solution and who have a real passion for what they do.

#### **The OPM Approach**

As a business manager you'll appreciate the wisdom of employing someone who's a specialist in their field. And that applies to the people you choose when it comes to raising finance too. OPM are specialists in the implementation of quality financial services for organisations proven across a wide range of businesses including the computer and communications sector, financial services, professions, manufacturing industries, universities, colleges, schools and local authorities.

#### **Simplicity**

You'll find it's an extremely convenient way to acquire equipment on finance. Almost everything can be handled over the phone - there are no interviews or visits, unless requested and paperwork is kept to a minimum. If you have something in mind, we can give you specific figures immediately.

#### **Benefits to you / Profit and Payment**

Profits today are seldom generated immediately so it makes good commercial sense not to pay in full before your equipment has earned a return on the investment capital. OPM's structured finance packages gives business IT solutions the opportunity to pay its way, a vital factor in today's economy.

#### **100% Software Funding**

#### **Retention of Capital**

Our facilities can be used without disturbing other credit lines, i.e. banks, company reserves and finance houses. This protects working capital and prevents upsetting cashflow projections by a large single capital payment.

#### **Fixed Rentals**

All payments are fixed for the agreement term - unless the rate of VAT changes.

#### **Tax Efficient**

Usually payments can be totally offset against tax.

#### **Leading Edge of Technology**

With the right financial solution the need to pay outright is removed - justifying a replacement becomes a natural progression. Customers are able to take full advantage of new technology and software upgrades with flexibility, ease and convenience.

#### **Strategic Partner**

OPM Leasing deliver through their Group of Companies, individually tailored finance solutions to meet each customers budgetary requirements. We take care of everything, ensuring that all finance facilities run smoothly. Our specialist expertise is balanced by an acute awareness of commercial reality.

# action ► apply online
